

Your IT systems
are the backbone
of your business.

But

poor IT habits
could be slowing
you down...

...and leaving
you open to

dangerous
cyber
threats.

**Outdated devices,
slow systems, and
weak security...**

- ✘ frustrate your team...**
- ✘ waste time...**
- ✘ and hurt productivity.**

For example:

- ✘ **An old computer** that takes 10 mins to start up
- ✘ **A slow internet connection** that keeps dropping out
- ✘ **Employees clicking on phishing emails** because they don't know better

The result?

**Your business
grinds to a halt.**

**Cyber criminals
love businesses
with poor IT habits.**

They target

- ✘ weak passwords,
- ✘ outdated systems,
- ✘ and untrained staff.

The fix doesn't
need to be
complicated.

By upgrading your tech, training your team, and improving security, you can:

- ✓ **Boost** productivity
- ✓ **Protect** your business
- ✓ **Save** money in the long run

We can help you
ditch your bad
IT habits.
