# REINTIVITY

Microsoft

Go beyond traditional endpoint management

Microsoft Intune Suite:

Strengthen cyber safety and gain IT efficiency with advanced endpoint management solutions.

Trying to retroactively plug scenario gaps with multiple 3rd party solutions results in higher risk and higher cost.

Microsoft integrated value

- Remote Help
- Advanced app management
- Tunnel for Mobile App Management
- Cloud-based certificate management
- Endpoint Privilege Management
- Advanced endpoint analytics

Scenario gaps:

- Application management lifecycle
- Assist employees wherever they are
- Corporate access from BYOD
- Improving end user outcomes to reduce IT efforts
- Enabling least privilege access for standard users
- Certificate management

Challenges:

- Vendor management overhead
- Multiple console complexity
- Fragmented visibility
- Degraded performance
- Larger attack surface

Intune Suite is a *single* solution that addresses all your scenario gaps in a rapidly changing workplace, and does so simply, securely, and cost-effectively.

Reduce costs

Do more with less by consolidating vendors with Microsoft for efficient, cost-effective licensing. Improve end user productivity and performance across devices.

Projected 3 Year benefits with the adoption of the Intune Suite

Vendor licensing consolidation	Improved end user experience	Increased IT productivity	Enhanced security posture
$5.2M	**$1.3M**	**$1.2M**	**$1.0M**
Reduced license fees	Employee productivity improvements	Automation and improved collaboration with SecOps	Reduced risk of data breach and cost of productivity loss
