REINTIVITY   Microsoft Azure

Migrate to Azure with confidence

Maximize your Windows Server value with a trusted Microsoft partner

85%[1]
over standard pay-as-you-go rates for Windows and SQL Server with Azure Hybrid Benefit

$1B
annual investment in security

406%[2]
3-year ROI

45%[2]
faster delivery of new applications

We can help you navigate the complexities of cloud adoption, optimizing your investments and reducing implementation risks to unlock the full value and security capabilities of Azure. Our services include:

- Assessing your infrastructure to understand your existing landscape
- Collaborating with you to develop a cloud adoption strategy
- Implementing and supporting your cloud adoption plan

Bring existing Windows Server and SQL Server licenses to Azure

With Azure Hybrid Benefit, you can maximize your existing investments and transition to the cloud at your own pace

Save up to **40%**[1]
with Azure Hybrid Benefit

Save up to **80%**[3]
with Azure Hybrid Benefit + Reserved Instances

$ Reduce risk and increase savings across cloud and hybrid environments. Migrate to Azure and get **3 years of free extended security updates** for your 2012/R2 workloads (end of support is 10/10/2023)

Get industry-leading price performance with SQL on Windows Server on Azure

Experience up to **57%**[4]
faster performance of SQL Server on Azure
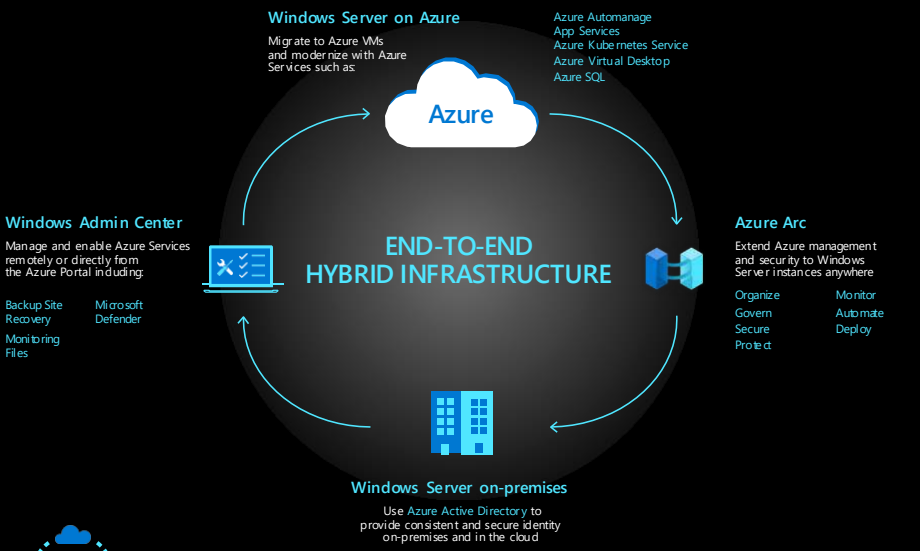

...and costing up to **54%**[4]
less than AWS

Protect apps, data, and IT workloads in Azure

Windows Server offers comprehensive security with built-in protection in Windows Server VMs and Microsoft Defender for Cloud

- 65 trillion threat signals analyzed daily
- 8,500 security experts

Microsoft Defender for Cloud
Unified security management across hybrid cloud workloads

Microsoft Sentinel
AI-driven Security Information and Event Management (SIEM)

SQL Analytics
Unique database security monitoring for your cloud SQL

Update Management
Automation tool to manage operating system updates

Azure Confidential Computing
Protect and secure data while it is in use

Take advantage of cloud innovations for on-premises workloads

Windows Server on Azure
Migrate to Azure VMs and modernize with Azure Services such as:

Azure Automanage
App Services
Azure Kubernetes Service
Azure Virtual Desktop
Azure SQL

Azure

END-TO-END HYBRID INFRASTRUCTURE

Windows Admin Center
Manage and enable Azure Services remotely or directly from the Azure Portal including:

Backup Site Recovery
Monitoring Files
Microsoft Defender

Azure Arc
Extend Azure management and security to Windows Server instances anywhere

Organize
Govern
Secure
Protect
Monitor
Automate
Deploy

Windows Server on-premises
Use Azure Active Directory to provide consistent and secure identity on-premises and in the cloud

Modernize your workloads with new and improved features on Azure

- Unlock innovation with AI capabilities
- Enable secure remote work by deploying virtual desktops and apps quickly and easily with Azure Virtual Desktop
- Get continuous security assessment of your cloud resources running in Azure with Defender for Cloud
- Gain flexibility and consistency with native .NET support in App Service and Azure Kubernetes Service

Windows Server on Azure is:

Resilient
Backup and disaster recovery you can trust

48%[5]
faster backups

80%[5]
reduction in average recovery time

Efficient
Efficiently run core applications on Azure

160k
IOPS disk storage for your most demanding workloads

Scalable
Scale applications with uncompromised performance

Create and manage up to **1,000** load-balanced VMs in minutes

Run mission critical Windows Server and SQL Server apps in Azure

We can help you plan and implement your cloud migration. Let's connect to start building your migration plan to Azure today
